

To whom it may concern,

With so much controversy and turmoil in our country at this time, school safety is at the forefront of our minds more now than ever. A large portion of the students who will attend Menfee Central do not live in a traditional household; they are living with a family member or are placed in a foster care system, therefore, we always have to be on high alert when it comes to student access. Having a high-tech camera system and badge reader access doors would only benefit the staff and students of Menfee Central and keep school safety at the forefront. As PTO President of Menfee Central, we support the endeavor to help make our new facility state of the art in security.

Menfee Central PTO President,

Megan Pennington
